# **Saudi Innovation in Enterprise AI**

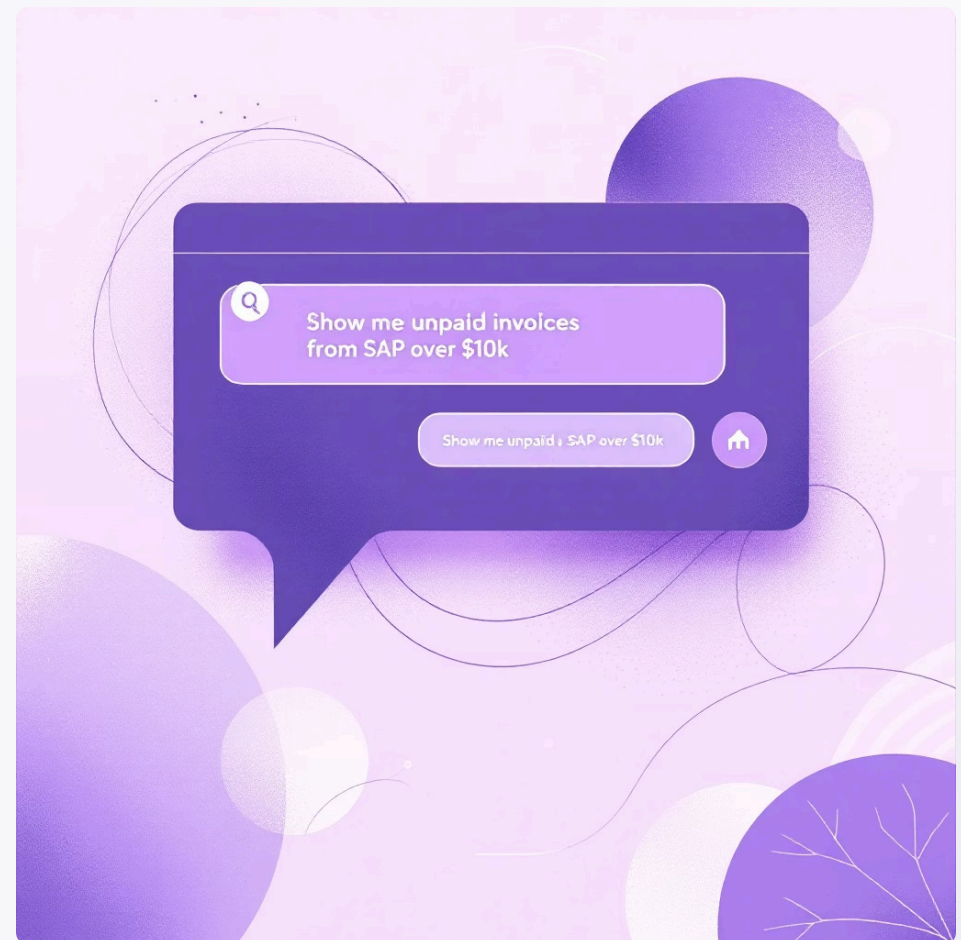

We turn organizational data and documents into intelligent, actionable insights — empowering leaders to make faster, smarter, and more strategic decisions.

## About Ensyte

Ensyte is a Saudi enterprise AI company based in Riyadh, specializing in platforms that enable organizations to:

- Connect and analyze data from multiple systems
- Transform documents into searchable intelligent knowledge
- Automate and support decision-making across all departments
- Deploy secure, private AI models within their own infrastructure

Our Saudi-trained Large Language Models (LLMs) understand the **language, culture, and operational context** of organizations in the GCC — enabling precise insights and realistic impact.

## Our Product Portfolio

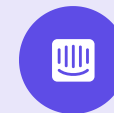

### Ensyte Qarar

An intelligent platform for data integration, analysis, and executive insights, delivering precise, actionable recommendations.

### Ensyte Knowledge

A comprehensive solution for centralizing and intelligently managing organizational knowledge and documents.

### Custom Solutions

Tailored AI-driven applications designed to meet unique business challenges and specific industry needs.

# Ensyte Qarar Platform.

## The Intelligent Platform for Data Integration, Analysis, and Executive Insights

Turn your data into strategic intelligence.

**Ensyte Qarar** empowers organizations to connect, analyze, and uncover insights from all their data sources. Driving smarter, faster, and future-ready decisions across every level of the enterprise.

# Revolutionizing Enterprise Intelligence

## What is Ensyte Qarar?

**Ensyte Qarar** is an integrated executive AI platform that empowers organizations to connect directly to their data from multiple sources — including SQL databases, Odoo ERP, SAP ERP, Airtable, and uploaded files — building a unified and intelligent knowledge base that users can interact with naturally through conversation.

The platform provides a truly interactive experience through intelligent chat capable of understanding language, context, and organizational structure — analyzing data and generating precise, actionable recommendations based on best practices and local insights.

### Seamless Integration

Connect all your data sources into one unified intelligence layer

### AI-Powered Analysis

Advanced language models trained on Saudi data for contextual precision and cultural relevance.

### Actionable Insights

Transform raw data into strategic recommendations that drive results

# Advanced Local Language Model

At the core of Ensyte Qarar lies a sophisticated, locally-deployed Large Language Model (LLM) meticulously trained on Saudi government and enterprise datasets.

01

---

## **Saudi-Trained Foundation**

Built on comprehensive Saudi government and enterprise data for exceptional contextual accuracy.

03

---

## **Contextual Intelligence**

Understands local operational objectives, regulations, and strategic priorities with unprecedented depth.

02

---

## **Custom Training**

Can be further fine-tuned on your organization's data, workflows, and business rules.

04

---

## **Continuous Learning**

Evolves alongside your organization, delivering increasingly relevant and forward-looking insights.

Ensyte Qarar doesn't just answer questions — it analyzes, interprets, and transforms your data into strategic, actionable intelligence grounded in both local performance and global standards.

# Comprehensive Data Integration

Ensyte Qarar seamlessly connects with your existing systems and data sources, creating a unified analytical intelligence layer that brings all your organizational knowledge together in one powerful platform.

## SQL Databases

Direct connection to your relational databases for real-time data access and analysis

## Odoo ERP

Full integration with Odoo enterprise resource planning systems

## SAP Systems

Connect to SAP ERP for comprehensive enterprise data insights

## Airtable

Seamless integration with cloud-based collaborative databases

## Smart Documents

Upload multiple files to create an intelligent, searchable knowledge base

# Enterprise-Wide Intelligence

## Empowering Every Department

Ensyte Qarar serves as a strategic tool for senior management and all operational departments, delivering comprehensive analysis and immediate recommendations to improve performance and operational efficiency across the organization.

### Executive Management

Strategic insights and performance dashboards for informed decision-making at the highest level

### PMO

Project portfolio analysis, resource optimization, and delivery performance tracking

### Finance

Financial analysis, forecasting, budget optimization, and cost management insights

### Human Resources

Workforce analytics, talent management, and organizational development recommendations

### Sales & Marketing

Customer insights, campaign performance, pipeline analysis, and market intelligence

# Intelligent Analysis & Benchmarking

Ensyte Qarar goes beyond simple reporting by delivering intelligent comparative analysis that positions your organization's performance against both local and global benchmarks. It identifies opportunities for improvement and recommends evidence-based solutions built on proven best practices and data-driven methodologies.

## Internal Performance Analysis

Deep dive into your operational metrics and KPIs

## Benchmark Comparison

Compare against local Saudi and global industry standards

## Strategic Recommendations

Actionable insights based on best practices and proven methodologies

## Identify Strengths

Recognize and leverage your competitive advantages

## Uncover Opportunities

Discover untapped potential for growth and improvement

## Implement Solutions

Execute evidence-based recommendations that deliver results

# **Ensyte Knowledge Base Platform.**

**A platform that transforms internal documents into an intelligent knowledge assistant that employees can query instantly — without accessing the original files.**

# Ensyte Knowledge Capabilities:

01

---

**Create multiple knowledge bases per department or project**

02

---

**Upload documents in all formats: PDF, Word, Excel, PowerPoint, CSV, images, and more.**

03

---

**AI-powered contextual document understanding**

04

---

**Automatic content understanding and context-aware knowledge extraction powered by AI**

05

---

**Chat interface similar to ChatGPT, supporting both text and voice conversation**

06

---

**Fine-grained access controls**

07

---

**Embeddable chat widget for integration into internal systems or portals.**

08

---

**Central management dashboard to control users, permissions, and usage insights.**

Powered by Saudi Private LLM

Deployable On-Premise or on Private/National Cloud — ensuring maximum data privacy and compliance.

# Transform Your Decision-Making Today

## Data to Decisions

Convert raw information into intelligent, actionable strategies

## Innovation & Sustainability

Support long-term growth through intelligent analysis and strategic vision

## Precision Leadership

Empower leaders to make accurate decisions based on deep analysis and facts

## Unified Intelligence

Centralize organizational knowledge in one easy-to-use platform

Our vision: To become the leading intelligent executive mind in the Middle East, combining local data intelligence with global standards to provide strategic insights that enable organizations to make smarter, faster, and more future-aware decisions.
